

ELECTRICAL RECONNECTION PROCESS

City of Fairburn Building Department
314 NW Broad Street
Fairburn Ga. 30213
770-964-2244 Ext. 401

Dear Customer,

To re-establish electrical service to a residence or structure, a permit must be obtained and an inspection conducted. Please provide proof of ownership, a signed lease or notarized authorization from the owner when applying for a permit. Once you have the permit on site, you may schedule an inspection by email at inspection@fairburn.com. Please include any special instructions (call ahead, lock box codes, etc.), permit number, address, type of inspection and a contact number. Inspections received by 4:00pm will be conducted the next regular day of business, excluding holidays or inclement weather. Note: the inspector will need to enter the building to inspect inside the panel.

Once the inspection is complete and the service approved, a release will be sent to the utility company. Should the inspection fail due to electrical or life safety issues, a correction notice will be left on site.

Electrical & Life Safety issues include but are not limited to: Improper grounding or bonding of electrical systems, deterioration of electric equipment causing it to be unserviceable, improperly maintained electrical services, hazardous existing wiring, new (recent) wiring installed without permits. Replacement of the panel or service conductors will also require that smoke and CO detectors be installed to code.

Sincerely,

Brian Epstein
Building Official
